Profile

Software Engineer with experience in full-stack development and a strong backend focus, as well as distributed systems, cloud technologies, and DevOps practices. Versatile and quality-driven, I aim to contribute to the design of reliable, high-performance, and scalable solutions.

Education

NATIONAL SCHOOL OF APPLIED SCIENCES OF AL HOCEIMA (ENSAH) <i>Engineering Degree in Computer Engineering</i>	2022 - 2025
NATIONAL SCHOOL OF APPLIED SCIENCES OF AL HOCEIMA (ENSAH) <i>Preparatory Cycle</i>	2021 - 2023
Oum Al Quora High School <i>Baccalaureate in Mathematical Sciences B - French Option</i>	2020 - 2021

Professional Experience

ORACLE R&D CENTER - Final-Year Project Intern	February 2026 - July 2026 <i>Casablanca, Morocco</i>
- Contributed to the maturity of the OCI Rust SDK by developing typed clients and examples for Limits, Monitoring, Load Balancer, and Work Requests - Implemented cross-cutting features: automatic request identifiers, waiters for asynchronous operations, and retries with exponential backoff - Enhanced the Rust runtime and Java/Mustache code-generation pipeline, validated through unit tests, generator tests, and Cargo builds Technologies: Rust, Java, OCI, Cargo, Maven, Mustache, Swagger/OpenAPI, REST APIs, unit testing	
ALTEN - Software Development Intern	July 2025 - August 2025 <i>Fez, Morocco</i>
- Designed an AI-powered IT Service Management platform using a DDD-based, event-driven microservices architecture - Developed NLP-based ticket routing, a RAG chatbot, JWT access control, and a KPI monitoring dashboard - Implemented a complete DevSecOps pipeline covering code quality and security, containerization, cloud provisioning, Kubernetes deployment, and monitoring Technologies: Java, Spring Boot, Angular, PostgreSQL, Redis, Kafka, Docker, Jenkins, SonarQube, Trivy, Terraform, Azure AKS, Prometheus, Grafana	

Projects

TALENT ACQUISITION MANAGEMENT SYSTEM (TAMS)
- Developed a recruitment management application with Spring Boot, Spring Security JWT, microservices, DDD, and event-driven CQRS on the backend, with React.js and Redux on the frontend - Enabled secure and efficient talent request management with automated job posting - Containerized microservices with Docker and implemented an automated Jenkins CI/CD pipeline for reliable deployment and testing
AI-POWERED INTELLIGENT CAREER GUIDANCE
- Developed a Java application for personalized career recommendations using Spring Boot, MongoDB, and secure JWT authentication - Built an interactive Angular platform to dynamically display recommended career paths and associated skills - Dockerized the application and deployed it on cloud infrastructure for scalable access

WEB PLATFORM FOR TEXT ANNOTATION

- Developed a collaborative text annotation and dataset management tool using Spring Boot, JWT, and Thymeleaf
- Implemented role and task management, security, an intuitive interface, and performance optimizations

SOCIAL MEDIA SENTIMENT ANALYSIS WITH BIG DATA

- Developed a Java sentiment analysis application using Hadoop, Spark, and NLP models
- Built a JavaFX user interface for results visualization

UNISPHERE, SCHOOL MANAGEMENT WEB PLATFORM

- Developed a responsive web platform for managing administrative services at ENSAH
- Built with a React.js frontend, Laravel backend API, and JavaScript features for student enrollment, grade management, and administrative workflows

Technical Skills

Programming Languages: Java, Rust, PHP, JavaScript, Python, C++, C#

Web Technologies: HTML5, CSS3, Tailwind CSS, RESTful APIs, JSON, GraphQL

Frameworks & Libraries: Angular, Laravel, React.js, Next.js, TypeScript, Express.js, Spring Boot, Spring Security, Spring Data JPA, Spring Cloud

Databases: MySQL, PostgreSQL, MongoDB, Redis, Oracle

Java Ecosystem: Java EE, Servlet API, JSP, Hibernate, Maven/Gradle, JPA, Microservices, Spring MVC

DevOps & Cloud: Git, GitHub, GitLab, Docker, Kubernetes, JUnit, Jenkins, CI/CD, Linux, AWS, Azure, Terraform, Prometheus, Grafana

Architecture & Design: Microservices, DDD, CQRS, Event-Driven Architecture, Design Patterns

Message Brokers & Tools: Apache Kafka, RabbitMQ, Postman, SonarQube, Trivy, Jira

Certifications

Oracle Cloud Infrastructure 2026 Certified DevOps Professional — Oracle

Oracle Certified Professional: Java SE 17 Developer — Oracle

Oracle Certified Associate: Java SE 8 Programmer — Oracle

Oracle Cloud Infrastructure Foundations Associate — Oracle

Extracurricular Activities

President – ENSAH CHESS CLUB: Organized the first FARAS regional chess tournament, coordinated the team, and ensured effective communication. Developed leadership and event management skills.
